

LEADING THE INDUSTRY WITH MODULAR SOLUTIONS

### TEKNO NEWS

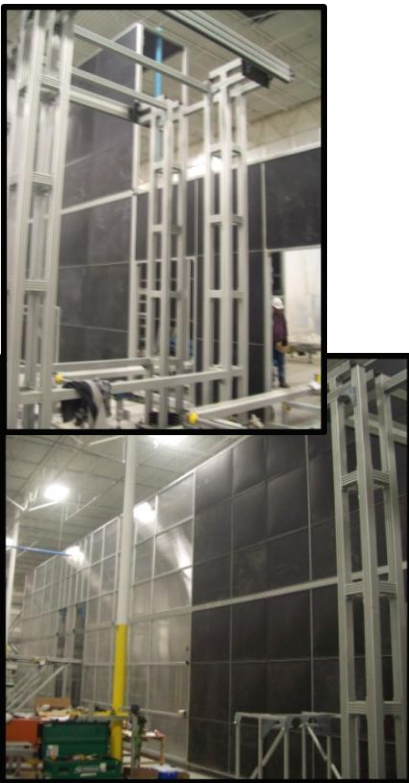

#### Tekno's Rolling Automation Show

As the weather starts to warm up, we are excitedly awaiting to put more miles on our show trailer.

Trips are being scheduled now. So, e-mail us or call us to get your plant on the list.

### FEATURED PROJECT

#### Tekno Storage and Curing System

Tekno is currently nearing the end of a major installation of a storage and curing system. The system includes temperature and humidity controlled zones which utilize insulated wall sections and racking constructed from Tekno's Modu-Tek extrusions. Air flow is controlled throughout to assist in the curing process.

Parts are transported in pallets constructed of Tekno's Modu-Tek extrusions on our conveyor systems and ASRS cranes.

Look for more information to follow regarding this project.

This is just another example of the diverse applications for our product. Give us a call today to discuss a solution for your processing needs.

### Website Update – New Video

#### ASRS System

Watch our website for an updated video of our ASRS Crane system.

This new video will be available soon for download showing new features and capabilities.

Give us a call to discuss your ASRS needs.
