

Towable Part Supply Carts

Tracking Connectability: These carts can be hooked together to form a series/sequence that allows one towing device to transport numerous carts.

Strength: The steering bars are made of solid steel, featuring a heavy-duty ball bearing that allows the tow bar to rotate up to 360 degrees. Hitch pin, receiver, and tongue ends can all be custom made to supplement your specific application.

Versatility: As with all of our products, these carts can be supplemented with Modu-Tek additions and improvements. Easily add our Flow Racks, extrusions, brackets, guarding/doors and other accessories to customize.

Mobile Various-Duty Carts

Modu-Tek

is about solutions.

It is about customers...

creativity...

productivity...

ingenuity...

all at a very fair price.

Most Versatile...

Only your own imagination limits what you can build with Modu-Tek.
